SOAP Note

Patient: Patient | **Clinician:** Dr. Yuki Tanaka

Date: Sep 12, 2026 · 07:11 PM | **Encounter ID:** visit-2bb9088c

Subjective

Patient reports elevated blood pressure readings at home (164/95) on two separate occasions with no associated symptoms.

Objective

Not documented

Assessment

Elevated blood pressure consistent with Stage 1 hypertension, requiring confirmation and management.

Plan

Not documented

Differential Diagnosis Suggestions

Supportive suggestions only; requires clinician verification and approval.

1. Essential Hypertension (76%)

Rationale: Consistent elevated BP readings meet Stage 1 criteria, requiring confirmation and management per guidelines.

2. White-Coat Hypertension (67%)

Rationale: Isolated home readings may reflect measurement artifact or stress response; requires ABPM for exclusion.

3. Secondary Hypertension (renal) (50%)

Rationale: Low suspicion given lack of historical/clinical cues (e.g., CKD, renal artery stenosis).

4. Tension-Type Headache (38%)

Rationale: No headache symptoms reported; irrelevant to current presentation.

5. Caffeine-Withdrawal Headache (37%)

Rationale: No caffeine use history or headache symptoms noted.
