SOAP Note

Subjective

Patient reports frequent urination and burning since yesterday, cloudy strong-smelling urine, no fever, mild lower abdominal discomfort.

Objective

Not documented

Assessment

Patient presents with symptoms consistent with possible lower UTI; urine testing needed for confirmation.

Plan

Arrange urine test; consider antibiotics if infection confirmed; safety-net for fever or flank pain.

Differential Diagnosis Suggestions

Supportive suggestions only; requires clinician verification and approval.

1. Lower Urinary Tract Infection (Cystitis) (75%)

Rationale: Classic dysuria, frequency, cloudy urine

2. Urethritis (42%)

Rationale: Burning with urination

3. Vaginitis (28%)

Rationale: Possible overlapping genitourinary symptoms
