SOAP Note

Patient: Patient | **Clinician:** Dr. Yuki Tanaka

Date: Oct 21, 2026 · 06:14 PM | **Encounter ID:** visit-eb7e34a9

Subjective

Recently remarried patient desires to conceive a baby without complications, expressing anxiety about potential difficulties and frustration with the medical evaluation process. Does not recall last menstrual period and is resistant to providing detailed medical history.

Objective

Not documented

Assessment

Patient is seeking preconception counseling and fertility assessment but is resistant to standard evaluations.

Plan

Recommend comprehensive blood panel, fertility workup, pelvic exam, and Pap smear. Offered referral to a reproductive endocrinologist due to patient's resistance to standard evaluation.

Differential Diagnosis Suggestions

Supportive suggestions only; requires clinician verification and approval.

1. Preconception Counseling Needed (82%)

Rationale: Patient presents with a desire to conceive and anxiety about potential complications, but is resistant to standard preconception evaluations.

2. Anxiety Disorder Related to Fertility Concerns (76%)

Rationale: Patient exhibits anxiety and frustration related to fertility concerns, which may be impacting her willingness to engage in standard evaluations.

3. Non-Adherence to Medical Recommendations (67%)

Rationale: Patient is resistant to providing necessary medical history and undergoing standard preconception evaluations.

4. Allergic Rhinitis (59%)

Rationale: Patient reports mild sniffles related to dust allergy and is taking a decongestant.

5. Vitamin D Deficiency (56%)

Rationale: Patient is taking a vitamin D supplement, which may indicate a previous diagnosis or concern for deficiency.
