SOAP Note

Patient: Patient | **Clinician:** Dr. Yuki Tanaka

Date: Sep 08, 2026 · 08:59 PM | **Encounter ID:** visit

Subjective

Patient reports feeling incredibly tired over the past few weeks, accompanied by unquenchable thirst and frequent urination.

Objective

Not documented

Assessment

High blood sugar levels consistent with type 2 diabetes, based on symptoms and initial finger prick test.

Plan

Further evaluation and management for type 2 diabetes.

Differential Diagnosis Suggestions

Supportive suggestions only; requires clinician verification and approval.

1. Essential Hypertension (88%)

Rationale: Persistent elevated BP, on Lisinopril, strong pattern match.

2. Tension-Type Headache (71%)

Rationale: Afternoon onset, moderate severity, correlates with screen-time pattern.

3. White-Coat Hypertension (54%)

Rationale: Home readings infrequent; clinic readings consistently higher.

4. Caffeine-Withdrawal Headache (45%)

Rationale: Timing consistent. Caffeine history not yet confirmed.

5. Secondary Hypertension (renal) (22%)

Rationale: No renal workup documented. Rule out if BP control worsens.
